

Agrian Documented Handler & Agrian Handler Compliance allows processors, handlers and shippers to electronically receive information from growers, crop advisors and applicators. It's the only field documentation tool that tracks the commodity throughout the growing process.

### Agrian Documented Handler

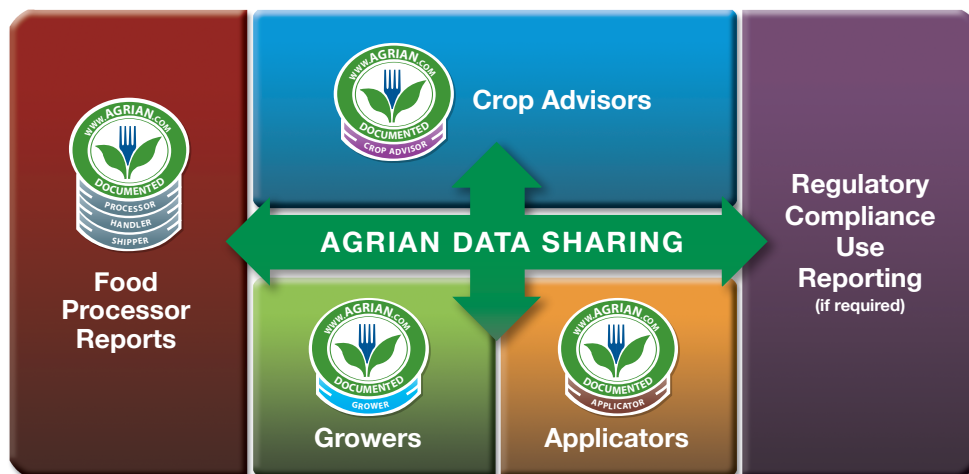

- ▶ Receive data from associated Agrian Documented Grower, Documented Advisor, and Documented Applicator accounts
- ▶ Recreate data manually from paper submissions
- ▶ Cross-reference submitted information (electronic or paper once entered) against manufacturer approved labels' data or internal compliance criteria
- ▶ Create automatic email alerts to be triggered when applications are submitted in violation of the chemical compliance criteria
- ▶ Run reports by growing site or growing block based on product name, active ingredient (AI), pre-harvest interval (PHI), and reentry interval (REI)

### Agrian Handler Compliance (requires Agrian Documented Handler)

Taking Agrian Handler to the next level is Agrian Handler Compliance. Offering all of the features of Agrian Handler **plus...**

- ▶ Organize, manage, and complete handler requirements
- ▶ Push handler requirements: GAP, Food Safety, etc, out to linked Agrian Documented accounts
- ▶ Receive and manage electronic submissions
- ▶ Import or export information into clients' internal accounting and inventory management systems
