DIRECTIONS FOR USE:

This product is recommended to correct zinc deficiencies. This product should be used on the basis of a soil and/or tissue analysis. For fertilizer application rates suitable for your geographical area or the maximum allowable application rate per acre, consult a certified crop advisor or a trained agronomist. For specific crop recommendations in your area, consult your state's recommendations. Scalped or severely eroded soils are more likely to be deficient in zinc than well-managed soils. Zinc deficiencies are more common on sands, sandy loams and organic soils because these soils originally contain low total zinc levels. Zinc availability decreases as the soil pH increases.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>.

Soil Broadcast:

Use 5-10 lbs./acre Zinc (14.1-28.20 lbs./acre AGRISOLUTIONS™ ZINC SULFATE 35.5%). (WI: 4-8 lbs/acre)

Soil Band:

Use 1-6 lbs./acre Zinc (2.8-16.9 lbs./acre AGRISOLUTIONS™ ZINC SULFATE 35.5%). Apply in row starter. Use the higher rate if soil pH or soil phosphorous levels are high. (WI: 2-4 lbs/acre)

This product is intended for use in further blending with agricultural grade fertilizers, and should be applied evenly.
