ADDITIVE FOR FERTILIZERS

NOT A PLANT FOOD INGREDIENT – This product is not a fertilizer.

Patents Pending

ACTIVE INGREDIENTS:
Ammonium Carboxylates .......................................................... 37.00%

INERT INGREDIENTS .......................................................... 63.00%

TOTAL .......................................................... 100.00%

KEEP OUT OF REACH OF CHILDREN

CAUTION

OPM #110160
PEEL BACK BOOK HERE AND RESEAL AFTER OPENING

NET CONTENTS:
To ensure uniform coverage of the fertilizer during the nation of urea, nitrate or ammonium phosphate. Uniform application in the field is necessary to ensure optimum results.

**Use**

**Broadcast Applications:** use a closed rotary drum mixer equipped with suitable internal spraying equipment, OR uniformly apply the 1 quart per acre. Apply 3-5 weeks before lifting.

**Warm Season Sod Production:**

**NOTE:** This product is not a fertilizer and should not be used as a substitute. It is compatible with most liquid fertilizer/herbicide spray mixes at manufacturers’ specified label rates. However, it is recommended that a “jar test” be performed prior to the actual application. In the event of fertilizer/herbicide compatibility problems, the recommended dosage rates below by the number of acres one ton of fertilizer will cover. When used in conjunction with sound fertility practices, ASSET® RS may improve the performance of nutritional products used in wide range of agricultural, ornamental, and turf applications.

**NOTE:** This product is not a fertilizer and should not be used as a substitute.

**USE RECOMMENDATIONS**

To determine the proper amount of ASSET® RS to add to the fertilizer, multiply the recommended dosage rates below by the number of acres one ton of fertilizer will cover.

**DOSAGE RECOMMENDATIONS**

**Row or Band and Injection Applications:** Use ASSET® RS at the rate of five (5) to six (6) ounces per acre.

**Broadcast Applications:** Use ASSET® RS at the rate of ten (10) to eleven (11) ounces per acre.

**Warm Season Sod Production:** 1 quart per acre. Apply 3-5 weeks before lifting.

**DRY GRANULAR FERTILIZER**

ASSET® RS may be impregnated on most nitrogen fertilizers or dry fertilizer blends that are composed of at least 50% of a combination of urea, nitrate or ammonium phosphate. Uniform application in the field is necessary to ensure optimum results.

**Use and Dosage Recommendations:** To ensure uniform coverage of the fertilizer during the ASSET® RS impregnation process, use a closed rotary drum mixer equipped with suitable internal spraying equipment, OR uniformly apply the ASSET® RS (see dosage recommendations above) with water to produce an adequate amount of solution to uniformly treat/impregnate the dry granular fertilizer.

**MIXING WITH ANHYDROUS AMMONIA**

ASSET® RS is readily soluble in liquid anhydrous ammonia. Carefully meter ASSET® RS into the anhydrous ammonia nurse tank or applicator tank by pumping it through an accurate, calibrated metering device into the liquid ammonia, either after filling or as the tank is being filled. Use a positive flow system or check valves, where appropriate, to prevent one product from entering the delivery tank of the other. Introducing both products simultaneously into the nurse tank or applicator tank automatically provides the mixing required for a uniform, homogeneous solution. Meter 0.45 gallons (3.6 pints, or 4.2 lbs.) of ASSET® RS into each ton of liquid ammonia. (This is equivalent to 3.2 quarts of ASSET® RS per 3589 lbs. of anhydrous ammonia, or 80 lbs. of ASSET® RS per 34,000 lbs. of ammonia.) When used with anhydrous ammonia add ASSET® RS at 0.034 ounces per pound of nitrogen applied.
CONDITIONS OF SALE – LIMITED WARRANTY
AND LIMITATIONS OF LIABILITY AND REMEDIES

Read the Conditions of Sale – Warranty and Limitations of Liability and Remedies before using this product. If the terms are not acceptable, return the product, unopened, and the full purchase price will be refunded.

The directions on this label are believed to be reliable and should be followed carefully. Insufficient control of pests and/or injury to the crop to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Helena Chemical Company (the “Company”) or seller. In addition, failure to follow label directions may cause injury to crops, animals, man or the environment. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the directions for use subject to the factors noted above which are beyond the control of the Company. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law.

The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Helena Chemical Company’s election, one of the following:

1. Refund of the purchase price paid by buyer or user for product bought, or
2. Replacement of the product used

To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.
