GENERAL INFORMATION

Advantages of using Actagro's Base 6-23-1 in the production of various fertilizer blends:

- It is very stable will store for a long period of time.
- Contains the highest content of organic acid (7.4%) of any formulation in combination with nitrogen and phosphate.
- Contains Actagro Organic Acids™, which are the most active humus fragments extracted from leonardite.
- · Readily blends with many liquid fertilizer components.
- · Has a very low salt index.
- Contains the purest form of phosphoric acid available in the market, virtually no heavy metals or contaminants.
- Ammonia, phosphoric acid, potash and Actagro Organic Acids[™] are chemically reacted to form a compound that is readily absorbed by a plant. In many cases the phosphate contained is 4 times more readily available than conventional phosphate sources.
- Product is manufactured having a pH of 6.0, virtually neutral, unlike other high concentrated phosphate products.
- It is non-phytotoxic.
- It is unique, no other like it, and manufacturing process is patented.
- Most important, it is very economical.
