

EcoSpreader

ORGANOSILICONE SURFACTANT

CA Reg. No. 17545-50036

PRINCIPAL FUNCTIONING AGENTS:

Siloxane polyalkyleneoxide copolymer
and polyalkyleneoxide 100%

KEEP OUT OF REACH OF CHILDREN WARNING

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a Poison Control Center or doctor for treatment advice.

IF SWALLOWED: Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a Poison Control Center or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably mouth-to-mouth if possible. Call a Poison Control Center or doctor for further treatment advice.

Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes substantial but temporary eye injury. Harmful if swallowed, inhaled or absorbed through skin. Do not get in eyes, on skin or on clothing. Avoid breathing spray mist. Wear protective eyewear, long sleeved shirt, long pants, shoes plus socks and chemical resistant gloves made of any waterproof material when mixing or handling concentrate. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

DIRECTIONS FOR USE

GREEN CYPRESS ECOSPREADER is a non-ionic organosilicone wetting agent that lowers the surface tension of spray solutions, resulting in more effective wetting and more uniform coverage of foliar surfaces. This product readily disperses in

spray solution and is especially suited to situations where coverage is critical and is particularly useful in low volume spraying and aerial applications where water coverage is a limiting factor. GREEN CYPRESS ECOSPREADER may be used as a tank mix partner with crop protection and nutrition products on agricultural, aquatic, forestry, turf and ornamental, industrial, structural and non-cropland sites. NOT FOR AQUATIC USE IN WASHINGTON.

Read and follow the precautions, restrictions and recommendations on the labels of pesticides used with this product. Use according to the most restrictive label directions for each product in any tank mix.

COMPATIBILITY: GREEN CYPRESS ECOSPREADER is compatible with most pesticides. However, if the desired combination has not been previously used, a compatibility test is recommended. This product will break down when mixed with highly acidic (below pH 4) or highly alkaline (above pH 9) chemicals, which may result in poor wetting and spray coverage.

MIXING: Fill spray tank $\frac{3}{4}$ full of water and begin agitation. Add products as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or dispersible granules, (2) Wettable powders, (3) Flowables, (4) Solutions, (5) Emulsifiable concentrates. Continue agitation until spray solution is completely mixed. Add GREEN CYPRESS ECOSPREADER. Minimal agitation of finished spray is recommended. For optimum results, use the spray solution within 24 hours after mixing. If spray solution has been allowed to stand, thoroughly agitate and remix before application. Thoroughly rinse the spray system with clean water after use to reduce corrosion.

RECOMMENDATIONS: GREEN CYPRESS ECOSPREADER will give best results in low volume spraying (~50% or less of the normal volume of water when sprayed to run-off). High water volumes will result in excessive run-off of spray solution and may lead to poor performance. Adjust either the product rate of the water volume to obtain thorough coverage without excessive run-off. Specific use rates will vary with conditions of application such as tank mix partner, water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Make a small amount representative of the intended spray solution and apply to a small area to ensure the product is providing adequate coverage and adjust as needed. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

Optimum spreading and wetting will occur between pH 5 and pH 9. Spray solutions outside this range should be sprayed immediately or adjust the solution to within the correct range to avoid breakdown of GREEN CYPRESS ECOSPREADER

FOR GROUND APPLICATIONS: Apply 3.2 - 13 fl.oz. per 100 gallons (0.025-0.1%).

FOR AERIAL APPLICATIONS: Apply 12-19 fl.oz. per 100 gallons (0.05-0.15%).

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD OR FEED
BY STORAGE OR DISPOSAL.

STORAGE: Store in original container away from children, animals, foods, feeds and seeds. Handle in accordance with Precautionary Statements. In the event of spillage or leakage, soak up the material with absorbent clay, sand, sawdust or other absorbent material. Scrape up and dispose in accordance with Product Disposal. **PRODUCT DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER DISPOSAL:** Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

CONDITIONS OF SALE AND WARRANTY

Monterey AgResources (MAR) warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. MAR neither makes, nor authorizes any agent or representative to make, any other warranties, express or implied, including fitness or merchantability.

The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of MAR and Seller. Buyer and user acknowledge and assume all risks and liability resulting from the handling, storage and use of this material not in strict accordance with directions given herewith. To the extent consistent with applicable law, neither MAR nor the Seller shall be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling storage or use of this product. The foregoing is a condition of sale by MAR and is accepted as such by the Buyer.
