57751 Imidacloprid 75 WSB

Imidacloprid 75 WSB is a systemic insecticide that controls sucking and chewing pests in turfgrass. It is highly toxic to aquatic invertebrates and should not be applied directly to standing or moving water. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain.

**Use in Water Soluble Pouches**

To prepare the spray mixture, remove the outer foil pouch and drop the required number of unopened, clear water soluble packets, as determined under Directions for Use, into the spray tank while filling with water to the desired level. Operate the agitator while mixing. Depending on water temperature and equipment normally used for the application of turfgrass insecticides is required. Use equipment which will produce a uniform, coarse-droplet spray, using a low volume of water. Do not apply more 8.6 oz. (0.4 lb of active ingredient) per acre per year. Effective control can be achieved when applications are made before or during the egg laying period. The timing of applications can be based on historical monitoring of the pests, previous records or experiences, current season weather, and other factors. For best control, apply before eggs hatch or before plants that will be affected by pests are visible. Irrigation or rainfall must occur within 24 hours after application to move the active ingredient through the thatch.

**Application Instructions**

QUALI-PRO IMIDACLOPRID 75 WSB can be used as directed on turfgrass such as bermuda, bluegrass, bentgrass, fescue, fairway blend, and other turfgrass species. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Do not formulate this product into other end-use products.

**User Safety**

For full and systemic insect control in turfgrass (including sod farms), landscape ornamentals, fruit and nut trees, and interior plantscapes.

**ACTIVE INGREDIENT:**

Imidacloprid 75 W (100% Imidacloprid) 75 WSB 10%

**OTHER INGREDIENTS:**

Water Soluble Pouches 10%

**TOTAL:**

100%

Do not remove packets from container except for immediate use. Keep water soluble packets in this container and store in a cool, dry place but not below freezing (32°F). Keep and wash PPE separately from other laundry.

**Hazardous to Humans and Domestic Animals**

- Do not ingest unless told to do so by a poison control center or doctor.
- Do not breathe dust or fumes.
- Do not eat or drink anything by mouth or touch an unbroken person.
- IF TOSSED OR SPILLED: Do not contaminate water when disposing of equipment washwaters.
- CAUTION: This product is highly toxic to aquatic invertebrates. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain.

**User Safety Recommendations**

- PPE: Chemical resistant gloves made of any waterproof material such as barrier laminate, nylon, rubber, neoprene rubber, natural rubber, polyethylene, polypropylene, or PVC. If you have more options, follow the instructions for Category C on the EPA chemiresistant category selection chart.
- Shirt and pants
- Coveralls
- Chemical resistant gloves made of any waterproof material such as barrier laminate, nylon, rubber, neoprene rubber, natural rubber, polyethylene, polypropylene, or PVC. If you have more options, follow the instructions for Category C on the EPA chemiresistant category selection chart.

**Environmental Hazards**

The product is highly toxic to aquatic invertebrates. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

**DIRECTIONS FOR USE**

This is a labeled Federal law to use this product in a manner consistent with the labeling.

Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain.

**INSTRUCTIONS FOR USE REQUIREMENTS**

For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

**INFORMATIONAL USE REQUIREMENTS**

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

**FIRST AID**

- **IF IN EYES:** Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Do not rinse eye 20 minutes or longer. Do not induce vomiting unless told to do so by a poison control center or doctor.
- **IF SWALLOWED:** Do not induce vomiting unless told to do so by a poison control center or doctor.  Do not eat or drink anything by mouth or touch an unbroken person.
- **IF SKIN OR CLOTHING:** Take off contaminated clothing and wash before reuse. Keep children and pets away from treated area until dry.
- **IF INHALED:** Remove to fresh air. If not improved, call a doctor.

**Disclaimer**

This product is highly toxic to aquatic invertebrates. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain. Do not apply the product in or above 32°F, in the fall when daytime temperatures are at or below 50°F, or in the rain.

**Proper Use Date:** 11/8/11

**Form:** CS-005-1-6/30/08/7
USE DIRECTIONS

Leafhoppers (including green fly, rose leafhopper, and annual and perennial meadow grass leaf hoppers), make application prior to egg hatch of the target pests. Refer to Application Instructions section of the label. 1.6 oz. to 11,000 sq. ft. (1 packet) per 300 gals. of water

To control Japanese beetles, (Popillia japonica) use on ornamentals to limit the honeydew available for ants. Do not apply more than a 2.1 inches in a single application. Do not make more than 5 applications. Allow 10 or more days between applications. Refer to the label instructions for other information.

INSTRUCTIONS

QUALI-PRO IMIDACLOPRID 75 WSB is a systemic product and will be translocated upward into the plant system from root uptake. Place the product carefully into the upper soil profile. QUALI-PRO IMIDACLOPRID 75 WSB is a systemic product and will be translocated upward into the plant system from root uptake. Place the product carefully into the upper soil profile. QUALI-PRO IMIDACLOPRID 75 WSB is a systemic product and will be translocated upward into the plant system from root uptake. Place the product carefully into the upper soil profile.

USE QUALI-PRO IMIDACLOPRID 75 WSB to control aphids, scale insects, mealybugs and other sucking pests on ornamentals to limit the honeydew available for ants.

To control aphids, (Aulacorthum spp. Asiatic garden beetle, Oriental beetle) use on ornamentals in containers and commercial and residential landscapes and interior plants. For best results, for the control of grubs, billbugs, European crane fly larvae or white grubs, apply to 12 inches out from the base. Grid System: Holes should be spaced on 2.5 foot centers, in a grid pattern, extending to the drip line of the tree. For application to trees - refer to FLOWERS and GROUNDCOVERS for additional use instructions.

Applying to trees, shrubs, evergreens, flowers, foliage plants, ground covers, and interior plants.

For use only in industrial and commercial buildings and on residential areas.
