

K-27

NONIONIC SPREADER AND STICKER FOR AGRICULTURAL SPRAYS

Principal Functioning Agents: Alkyl aryl polyoxyethylene glycols, Modified phthalic glycerol alkyd resin, Isopropanol, Sodium ethylene diamine tetraacetate

Constituents ineffective as a spray adjuvant.....44.74%

CAUTION FLAMMABLE LIQUID

MAY BE HARMFUL IF SWALLOWED CAUSES EYE IRRITATION

Avoid contact with eyes. In case of contact, flush eyes with water for at least 15 minutes and get medical attention. If swallowed, induce vomiting by inserting finger in throat. Drink copious quantities of water and obtain medical attention.

Keep Out of Reach of Children

Fresno, CA 93727

K-27 is a 100% water soluble product providing an easily diluted surface active agent. It is for use with herbicides, insecticides, fungicides and miticides as a spreading, depositing and sticking agent.

GENERAL GUIDE FOR USE

K-27 recommended usage depends on the crop; the pest; the kind of spray equipment; volume, pressure and droplet size of the spray; the pesticide or mixture being used; and water hardness conditions. Vary recommendations as necessary to achieve a smooth uniform film. Use only the minimum amount to get the desired effect.

Use K-27 on:

- A. Tree fruits and nuts
- B. Vineyards and vine crops
- C. Field and row crops

A: Dilute full volume sprays:	Oz. per 100 Gal.
1. Regular use (moderately easy-to-wet-plants)	2 to 4 oz.
2. Hard to wet plants	4 to 8 oz.
3. Very hard to wet plants	8 to 16 oz.

B: Concentrate sprays

As sprays are concentrated to 2x, 10x, etc., the amount of K-27 should be increased in about the same proportion as the pesticide.

C: Aerial use:

To improve pesticide coverage by air, use 1/2 to 3 pints K-27 in sufficient volume spray mix to cover.

K-27 should be added to the spray tank last, with agitator running, after all other ingredients are well mixed.

K-27 Spray Adjuvant is compatible and safe to use with nonselective herbicides, such as MSMA, Dowpon, Dow General, Amino Triazole, Paraquat, etc., where a spray adjuvant is recommended to be used with such materials.

NOTICE: Knapp Manufacturing warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use, storage or handling of this product contrary to label instructions or under abnormal conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. These risks include, but are not limited to, damage to plants, crops and animals to which the material is applied, failure to control pests, damage caused by drift to other plants or crops, and permanent injury.
