Calcium Boron
Amino Acid Chelate Soluble Powder Foliar

Meets NOP Standards
Net Weight: 4.4 pounds (2.0 kg)
Manufactured by:
Albion Laboratories, Inc.
101 North Main Street
Clearfield, Utah 84015 U.S.A.

GUARANTEED ANALYSIS (w/w):
Calcium (Ca) ................................................................. 13.0%
Boron (B) ......................................................................... 5.0%
Derived from Calcium Amino Acid Chelate and Sodium Tetraborate.

GENERAL INFORMATION:
Amino acid chelated Metalosate® Calcium Boron soluble powder
is designed for foliar application on plants to prevent or correct
nutrient deficiencies that may limit crop growth and yields. It is
water soluble and nontoxic to plants when applied as directed.
For best results, apply Metalosate® Calcium Boron soluble
powder according to recommendations based on plant tissue or
soil analysis.

DIRECTIONS:
Apply by a spray method and in an adequate amount of water
that will provide complete coverage of the plants. Use of a
non-ionic wetting agent may improve spray coverage of certain
hard to wet plants.
Metalosate® Calcium Boron soluble powder can be included
in a regular spray program on crops. Consult with an Albion®
representative on compatibility with other spray materials.
The rate of application will depend on the crop, stage of growth,
and severity of deficiency. The maximum recommended rates
are for mature, full-sized plants. Reduce the rates proportionately
when spraying smaller plants.
Metalosate® Calcium Boron soluble powder may be used on
legumes, grain crops, root crops, cucurbits, cole crops, leafy
vegetables, woody and herbaceous ornamentals, deciduous
fruits, vine crops, tropical and subtropical fruits, and many other
crops.

RECOMMENDATIONS:
Field Crops and Vegetables: Apply 7 to 14 ounces
(200 to 400 grams) per acre during periods of rapid growth or
nutritional stress. The application may be repeated 2 or more
times through the growing season.
Tree Crops: Make an application of 14 to 28 ounces
(400 to 800 grams) per acre after the beginning of active growth.
The application may be repeated at 2 to 4 week intervals through
the growing season.
Grapes and Berries: Make an application of 7 to 14 ounces (200
to 400 grams) per acre after active growth begins. The application
may be repeated at intervals of one week or more through the
vegetative-growth period.
CAUTION: This material contains boron. Its misuse may
cause serious injury to the crops. It should be used only
under the direction of fertilizer consultants.

LIMITED WARRANTY:
Seller’s and Manufacturer’s obligation is limited to replacement of
defective product. NEITHER SELLER NOR MANUFACTURER
SHALL BE LIABLE FOR ANY INJURY, LOSS, OR DAMAGE
DIRECTLY OR CONSEQUENTLY ARISING OUT OF THE
MISUSE OR INABILITY TO USE THE PRODUCT. ALL
OTHER WARRANTIES EXCEPT IN WRITING FROM THE
MANUFACTURER, WHETHER EXPRESSED OR IMPLIED ARE
HEREBY DISCLAIMED.
