**Monterey Insect Bait**

**Principal Functioning Agents:**
- Corn steep liquor: 99.7%

**Constituents Ineffective As Spray Adjuvant:**
- 0.3%

**Total:** 100.0%

---

**Precautionary Statements**

**Hazards to Humans and Domestic Animals**

**Caution:** Causes moderate eye irritation. Harmful if swallowed or inhaled. Avoid contact with eyes or clothing. Avoid breathing spray dust. Wear long sleeved shirt, long pants, and shoes plus socks when mixing or handling concentrate. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

**Environmental Hazards**

Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

---

**Directions for Use**

MONTEREY INSECT BAIT is a corn derived, proteinaceous liquid that enhances the effectiveness of agricultural insecticides. The protein bait acts as a food attractant and its success in an IPM program is based on the immature female fruit flies’ need of a protein meal for developing mature eggs.

Read and follow the precautions, restrictions and recommendations on the labels of insecticides used with MONTEREY INSECT BAIT. Use according to the most restrictive label directions for each product in any tank mix.

**Compatibility:** MONTEREY INSECT BAIT is compatible with most insecticides. However, if the desired combination has not been previously used, a compatibility test is recommended. Using MONTEREY INSECT BAIT with copper compounds or shortly after an application of copper may reduce effectiveness.

**Mixing:** Shake well before using. Although this product may contain a small amount of suspended solids, they should not interfere with spray nozzle performance. Fill spray tank ½ full of water and begin agitation. Add pesticides as directed by label or in the following sequence and continue filling tank: (1) Dry flowables or water dispersing granules, (2) Wettable powders, (3) Flowables, (4) Solutions, (5) Emulsifiable concentrates. Add MONTEREY INSECT BAIT last and continue agitation until spray solution is completely mixed. Continuous agitation of finished spray is recommended. If spray solution has been allowed to stand, thoroughly agitate and remix before application.

**Recommendations:** Specific use rates will vary with conditions of application such as water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

**Air or Ground:** Use 2-8 pints per acre with sufficient water for thorough coverage. Due to the attractant mode of action, overall coverage of the plant canopy is unnecessary and a ‘spot spraying technique’ is adequate. Bait spraying is most effective in ‘area’ treatment programs. It is ideal for medium to large fields and orchards or where adjacent properties use the technique.

---

**Storage and Disposal**

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.

**Storage:** Store in original container away from children, animals, foods, feeds and seeds. Handle in accordance with Precautionary Statements. In the event of spillage or leakage, soak up the material with absorbent clay, sand, sawdust or other absorbent material. Scrape up and dispose in accordance with Product Disposal. **Product Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **Container Disposal:** Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

**Conditions of Sale and Warranty**

Monterey AgResources (MAR) warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. MAR neither makes, nor authorizes any agent or representative to make, any other warranties, express or implied, including fitness or merchantability. The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of MAR and Seller. Buyer and user acknowledge and assume all risks and liability resulting from the handling, storage and use of this material not in strict accordance with directions given herewith. In no case shall MAR or the Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by MAR and is accepted as such by the Buyer.
