GUARANTEED ANALYSIS

Boron (B) ....................................................... 17.0%

Derived from boric acid.

Information regarding the contents and levels of metals in this product is available on the Internet at http://www.regulatory-info-monterey.com

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

CAUTION

KEEP OUT OF REACH OF CHILDREN
HARMFUL IF SWALLOWED - AVOID BREATHING DUST

DIRECTIONS FOR USE

PRECAUTIONS: WARNING - MONTEREY SUPER BORON WS is recommended for use on field, row, vegetable, fruit, tree, vine, ornamental and turf crops. Overapplication or excessive use of boron can result in boron toxicity. This may cause foliar damage or serious crop injury. The proper use of soil or petiole test recommendations will minimize the risk of overapplication of boron.

COMPATIBILITY: This product is compatible with many liquid fertilizers, micronutrients, and pesticides. Addition of MONTEREY SUPER BORON WS to these products should not be done without first testing compatibility on a small scale and checking for phytotoxicity.

When mixing with pesticides, add this product to the mix tank and solutionize with water prior to the addition of buffering agents and pesticides. Follow all directions and precautions on pesticide labels prior to mixing with MONTEREY SUPER BORON WS.

RECOMMENDATIONS: Suggested application rates are given below, but consult with your local State Agricultural Experiment Station or Extension Service for proper recommendations on the usage of this product. Fertilizer rates may vary according to area, climate, and crop being treated.

Soil Applications: Apply 3-10 pounds per acre. Apply with sufficient carrier to give complete coverage. Soil applied boron must be moved into the root zone to be absorbed by the plant. This can be accomplished by irrigation, rainfall, or tillage. Do not use MONTEREY SUPER BORON WS in soil applications where it will directly contact the seed.

Postharvest and Dormant Applications: Apply no more than 8 pounds per acre in sufficient water for thorough coverage. Make applications in the fall after harvest, at dormant, or at delayed dormant prior to bloom.

Foliar Applications: Apply up to 5 pounds per acre for trees and vines and up to 3 pounds per acre for row, field and other crops. Apply with enough carrier to thoroughly cover all foliage. Early morning or late evening applications give the best results. Boron is not easily translocated within the plant, therefore multiple foliar applications at low rates during the growing season are most effective.

CONDITIONS OF SALE AND WARRANTY

Monterey AgResources (MAR) warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. MAR neither makes, nor authorizes any agent or representative to make, any other warranties, express or implied, including fitness or merchantability.

The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of MAR and Seller. Buyer and user acknowledge and assume all risks and liability resulting from the handling, storage and use of this material not in strict accordance with directions given herewith. In no case shall MAR or the Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by MAR and is accepted as such by the Buyer.
