

#### Principal Functioning Agents/Active Ingredients:

Yucca extracts.....	30.0%
Garlic extracts .....	10.0%
<b>Constituents ineffective as spray adjuvants:</b>	
Water.....	60.0%
<b>Total</b>	<b>100.0%</b>

#### GENERAL INFORMATION

**Organic BioLink® Surfactant & Penetrant** is a low foaming, non-ionic type spreader, adjuvant.

**Organic BioLink® Surfactant & Penetrant** provides quick wetting, more uniform distribution, and increases retention of spray by reducing surface tension of the spray droplets.

**Organic BioLink® Surfactant & Penetrant** is a water-soluble adjuvant that may also be used as an interfacing agent for wettable powders. Variations in conditions of use can cause some variation in the amount of **Organic BioLink® Surfactant & Penetrant** required. The minimum required to give a smooth, uniform coverage usually gives the most effective results.

**CAUTION: KEEP OUT OF REACH OF CHILDREN. Liquid causes eye injury.** Avoid contact with skin, eyes or clothing (wear long sleeved shirt, long pants, shoes plus socks). Harmful if swallowed. Avoid breathing spray mist. Wash thoroughly with soap and water after handling.

**Storage and Disposal:** Store out of direct sunlight and at temperatures above freezing (0°C). Rinse and offer empty container for recycling or reconditioning or dispose of in a sanitary landfill.

#### DIRECTIONS FOR USE

**Organic BioLink® Surfactant & Penetrant** can be applied to all crops including fruit trees, vines, tree nuts, fruits and vegetables, field and row crops, ornamental trees, shrubs and flowers, containerized plants, and turf. Do not use on roses.

Some pesticides have stated adjuvant use rates. In all cases, the pesticide manufacturer's label should be consulted regarding specific adjuvant use recommendations and that rate followed. Do not add adjuvant at a level that would exceed 5% of the finished spray volume.

**Ground or Aerial Application:** ½ to 2 quarts per 100 gallons of water; can be applied with most pesticides and fertilizers.

**Nursery & Container:** 1 to 3 ounces per 5 gallons of water.

**Home & Garden:** 1 to 3 ounces per 5 gallons of water.

**Note:** This product has demonstrated excellent plant safety; however, not all species and varieties have been tested. Before treating a large area, treat a small area and observe prior to full-scale application.

**Mixing Instructions:** Prior to pesticide application, clean mixing and application equipment according to pesticide label directions. Adjust spray tank pH to a maximum of 6.0 before adding **Organic BioLink® Surfactant & Penetrant** to the tank. For wettable powders and water-soluble materials, add **Organic BioLink® Surfactant & Penetrant** in water before adding pesticide to spray tank. For emulsifiable products, add **Organic BioLink® Surfactant & Penetrant** after a good emulsion is formed. Note: for optimum results, spray mixes containing **Organic BioLink® Surfactant & Penetrant** should be applied within 36 hours.

**NOTE:** Perform a phytotoxicity test on a small plot before large-scale application. To lower the risk of phytotoxicity, applications should be made early morning or late evening.

**NOTICE OF WARRANTY** - Westbridge warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with the directions under normal conditions of use. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of Westbridge. In no case shall Westbridge be liable for consequential, special or indirect damages resulting from the use or handling of this product. Westbridge makes no warranties of merchantability or fitness for a particular purpose nor any other express or implied warranty except as stated above.
