The above suggestions are considered adequate for most uses. Some pesticide formulations or some crop conditions may require more or less PHT Binder than suggested. Check the deposit after the initial spray load and adjust the concentration if necessary.

*If mite infestations are severe with heavy webbing, use 2 pts. per 100 gal. of spray solution. On cotton and corn the best mite control is obtained using 2 pts. per 100 gal. of spray solution.

**NOTE:**

- PHT Binder may cause spotting to citrus fruit.
