SPECIMEN LABEL

SILWET® L-77 SURFACTANT
ORGANOSILICONE SURFACTANT
Complete Directions for Use, Use Precautions and Requirements

*ACTIVE INGREDIENTS:  (BY WEIGHT)
Polyalkyleneoxide modified heptamethyltrisiloxane..........................99.50%
CONSTITUENTS INEFFECTIVE AS ADJUVANT ...................................... 0.50%
TOTAL .................................................................................................................. 100.00%

*All ingredients are exempt from the requirements of a tolerance as specified in CFR40, 180.

KEEP OUT OF REACH OF CHILDREN
WARNING – AVISO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)
SEE INSIDE BOOKLET FOR ADDITIONAL PRECAUTIONARY STATEMENTS

DISPOSAL DISPOSAL: Triple rinse (or equivalent) and add rinseate to spray tank, then offer for recycling or reconditioning, or puncture and dispose of according to state and local authorities. If burned, stay out of smoke. For help in chemical emergencies involving spill, leak, fire or exposure call toll free 1-800-424-9300.

GENERAL INFORMATION
SILWET L-77® SURFACTANT is a 100% organosilicone product which has been proven to have effective and powerful wetting capabilities when used in aqueous spray mixes. Organosilicone surfactants are a distinctive class of nonionic wetting agents which have capacity to lower surface tension of aqueous mixes when used at lower rates than that of conventional organic nonionic surfactants. Therefore, for best results, it is recommended that a 100% organo-silicone be used only when specifically recommended by the pesticide manufacturer's label or after consulting your pesticide manufacturer or a locally recognized authority on the use of organosilicone based adjuvants. Optimum application and consequent effects can be influenced by many factors. Therefore, it is recommended that careful observation of the spray deposit be made and adjuvant rate adjusted accordingly to ensure thorough coverage without undue runoff.

DIRECTIONS FOR USE
SILWET® L-77 SURFACTANT has been found to be effective in agricultural applications at 0.25 to 0.25% v/v concentration. Some applications may require lower or higher surfactant rates for optimum effect. Do not add adjuvant at a level that would exceed 5% of the finished spray volume. When this occurs, adjust rates to obtain thorough coverage without excessive runoff. Diminished performance will result if tank mix pH is excessively high (above 9) or low (below 5). Optimum performance of SILWET® L-77 SURFACTANT will result between pH of 6 and 8. Prior to use of SILWET® L-77 SURFACTANT in any agricultural application, the user, applicator or advisor must have experience or must have conducted a phytotoxicity trial on the crop to which the application is to be applied.

MIXING
Prior to any pesticide application all spray mixing and application equipment must be thoroughly cleaned. Carefully observe all cleaning directions on the pesticide label.
1. To prevent or minimize foaming, fill tank to 2/3 to 3/4 full of water. If foaming is anticipated, the addition of an antifoaming agent should be added before pesticides, nutrients, or SILWET® L-77 SURFACTANT is added.
2. Add pesticides and/or fertilizers as directed by label or in the following sequence:
   A. Micronutrients and fertilizers
   B. Dry flowables and dispersible granules
   C. Flowables
   D. Water soluble pesticides
   E. Emulsifiable concentrates
3. Continue agitation.
4. Add SILWET® L-77 SURFACTANT and mix for 1 to 2 minutes with lower than normal agitation.
5. Continue filling tank, maintaining minimal agitation.
6. For optimum results, spray mixes containing SILWET® L-77 SURFACTANT should be applied within 36 hours after mixing.

CONDITIONS OF SALE - LIMITED WARRANTY
AND LIMITATIONS OF LIABILITY AND REMEDIES
Read the Conditions of Sale - Warranty and Limitations of Liability and Remedies before using this product. If the terms are not acceptable, return the product, unopened, and the full purchase price will be refunded.

The directions on this label are believed to be reliable and should be followed carefully. Insecticidal control of pests and/or injury to the crop to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Helena Chemical Company (the "Company") or seller. In addition, failure to follow label directions may cause injury to crops, animals, man or the environment. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the directions for use subject to the factors noted above which are beyond the control of the Company. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law.

The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Helena Chemical Company's election, one of the following:
1. Refund of the purchase price paid by buyer or user for product bought, or
2. Replacement of the product used.

Disclaimer: Always refer to the label on the product before using Helena or any other product.
