T-22™ Planter Box
Biological Fungicide

ACTIVE INGREDIENT
Trichoderma harzianum Rifai strain KRL-AG2............................. 1.15%*
OTHER INGREDIENTS.......................................................... 98.85%
TOTAL.............................................................. 100.00%
*Contains at least 1.0 x 10^7 colony forming units per gram dry weight.

US Patent No. 5,260,213
EPA Reg.No. 68539-4
EPA Est. No. 068539-NY-001
Net Contents: __________

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected workers may be in the area during application. For any requirement specific to your state or tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

For enclosed environments:
There is a restricted entry of zero (0) hours for this product when applied as a soil application via soil drench, in-furrow spray, transplant starter solution, dip, soak, chemigation or other non-spraying or non-dusting foliar application methods when used in enclosed environments such as glasshouses and greenhouses.

NOTE: DO NOT APPLY to sugarcane, pechay, rice, mushrooms, kiwi, tobacco, barley, oats, lemon, apple and chickpea. Not for use on aquatic crops.

APPLY VIA GROUND APPLICATION ONLY.

GENERAL INFORMATION
T-22 Planter Box (T-22 PB) is a preventative biological fungicide for control of plant diseases. The active ingredient is a microbe, Trichoderma harzianum Strain T-22 (KRL-AG2). Applied to seeds, transplants or other propagative material, or to soil or planting mixes, grows onto plant roots as they develop. When used alone or in conjunction with certain chemical fungicides; consult the T-22 PB compatibility chart for more information. This product should not be tank mixed with chemicals that contain the following active ingredients: benomyl, imazalil, propiconazole, tebuconazole, and triflumizole. Do not apply T-22 PB immediately before these pesticides are used. When early season seed rot and seedling diseases are expected, use chemically treated seed or other appropriate measures for stand establishment and T-22 PB for root disease control.

NOTE: T-22 PB contains live spores of a microbe that must be used prior to disease onset. T-22 PB becomes active in soil or on plants when temperatures are above 50°F and is not effective while temperatures remain cold. T-22 PB can be applied to sterilized or fumigated soil but MUST BE APPLIED AFTER STERILIZATION OR FUMIGATION.

USER SAFETY RECOMMENDATIONS
Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

ENVIRONMENTAL HAZARDS
Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment wash water.

KEEP OUT OF REACH OF CHILDREN

FIRST AID

If in eyes
- Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

HAZARDS TO HUMANS & DOMESTIC ANIMALS
CAUTION: Avoid contact with skin or eyes. Avoid breathing dust.

PERSONAL PROTECTIVE EQUIPMENT
Applicators and other handlers must wear: a) long sleeved shirt and long pants; b) shoes plus socks; c) when dumping or opening bags, or other operations where dusts may be created, wear a dust/mist filtering respirator (MSHA/NIOSH approval number prefix TC-21C) or a NIOSH approved respirator with an appropriate N-95, R-95, P-95 or HE filter for biological products. Follow manufacturer’s directions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

CONFIDENTIALITY STATEMENTS
This product contains information that is confidential, trade secret, and proprietary. Its disclosure is restricted to authorized users. It is the responsibility of those persons handling or applying this product to see that the information will not be divulged to anyone not authorized to receive it.

CAUTION: T-22 PB contains live spores of a microbe that must be used prior to disease onset. T-22 PB becomes active in soil or on plants when temperatures are above 50°F and is not effective while temperatures remain cold. T-22 PB can be applied to sterilized or fumigated soil but MUST BE APPLIED AFTER STERILIZATION OR FUMIGATION.

NOTE: T-22 PB contains live spores of a microbe that must be used prior to disease onset. T-22 PB becomes active in soil or on plants when temperatures are above 50°F and is not effective while temperatures remain cold. T-22 PB can be applied to sterilized or fumigated soil but MUST BE APPLIED AFTER STERILIZATION OR FUMIGATION.
VEGETATIVELY PROPAGATED CROPS, INCLUDING POTATOES, OTHER TUBERS AND BULBS: For planting or storage, treat at 1 - 3 oz T-22 PB to 100 pounds (1 cwt) bulbs or cut potato seed pieces. Apply to seed pieces or bulbs so surfaces are thoroughly covered with dust or aqueous suspension.

For potatoes, T-22 PB should be used with compatible chemical seed dusts. Consult the T-22 PB compatibility chart for detailed information. All surfaces, knives, and other equipment used to cut and plant potatoes should be thoroughly sterilized before cutting and planting and at regular intervals. The cut and treated seed pieces may be held for a week or more at cool temperatures, 45-50°F, and high relative humidity to promote suberization, however, they may be planted immediately.

IN-FURROW SPRAY OR TRANSPLANT STARTER SOLUTION: Apply as an in-furrow spray or transplant starter solution at a rate of 16 - 32 oz/acre in sufficient water to achieve uniform application. Maintain constant agitation. T-22 PB can be tank mixed with certain fertilizers and pesticides; consult the T-22 PB compatibility chart for detailed information.

ONSITE APPLICATION TO SEED: T-22 PB biological fungicide is applied to seeds at the rate of 4 - 10 oz per hundredweight (oz/cwt) for protection against root diseases. For example, for large, smooth seeds such as soybean or dry bean, apply 4 - 8 oz/cwt of seed. For smaller or rougher seed such as peas, or corn, apply 6 - 8 oz/cwt. For sweet corn, apply 8 -10 oz/cwt. To assure uniform application, add half the required amount of T-22 PB to half the seed in the hopper, mix with a wooden paddle, and then add the remaining seed and T-22 PB. T-22 PB can be applied in sufficient water to coat seeds. For maximum seed protection, especially in cold soils, apply T-22 PB to commercially treated seed such as seed treated with Captan, Apron and or Demesan for stand establishment. Consult the T-22 PB compatibility chart for detailed information.

COMMERCIAL SEED TREATMENT: T-22 WP may be applied as a slurry, a coating, in a pellet, or during seed priming. User must add an EPA-approved dye, imparting an unnatural color to the seed, to T-22 WP during the seed treatment process. Product is formulated at 1.0 X 10⁹ CFU/gm and should be applied to deliver the recommended CFU/seed. See table below.

T22PB 11/19/08

STORAGE AND DISPOSAL:
Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry place. Do not store near food or feed commodities. Do not store at temperatures above 75°F for prolonged periods. Keep container tightly closed when not in use.

DISPOSAL: Do not contaminate food or feed by disposal. Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility. Do not reuse container. Dispose of empty container in a sanitary landfill, or by incineration, or by open burning if allowed by state and local authorities. If burned, keep out of smoke.

NOTICE TO BUYER AND SELLER: Seller warrants that this product conforms to the description on the label and is reasonably fit for the purposes stated on the label when used and stored in accordance with directions under normal conditions of use. This warranty does not extend to use of this product contrary to label directions or under conditions not reasonably foreseeable by the Seller, and Buyer and User assume the risk of any such use. Seller disclaims all other warranties express or implied, including any warranty of fitness or merchantability. Seller shall not be liable for consequential, special or indirect damages resulting from use or handling of this product and Seller’s sole liability and Buyer’s and User’s exclusive remedy shall be limited to refund of the purchase price.

This product is sold only for uses stated on its label. No express or implied license is granted to use or sell this product under any patent in any country except as specified.
