**SECTION 1 - IDENTIFICATION**

- **Product identifier**: ZORO MITICIDE / INSECTICIDE
- **Product Code(s)**: None reported.
- **Product Use**: Insecticide for controlling a broad range of pests on crops.
- **Chemical Family**: Mixture
- **Supplier’s name and address**: Cheminova Inc.
  PO Box 110566
  One Park Drive
  Research Triangle Park, NC, USA
  27709
  919-474-6600 (8:00 AM - 5:00 PM, EST, Monday-Friday)
- **Manufacturer’s name and address**: Refer to Supplier
- **Information Telephone #**: 919-474-6600 (8:00 AM - 5:00 PM, EST, Monday-Friday)
- **24 Hr. Emergency Tel #**: Chemtrec 1-800-424-9300 (Within Continental U.S.); Chemtrec 703-527-3887 (Outside U.S.). For Medical Emergencies: (800) 303-6950

**OSHA**: This material is classified as hazardous under OSHA regulations (29CFR 1910.1200). Hazardous classification: Combustible liquid; Acute Health Hazard; Chronic Health Hazard

**WHMIS information**: This product is a Pest Control Product and is not regulated as a Controlled Product under the Hazardous Products Act (HPA). For informational purposes, this product would have the following WHMIS classification: Class B3 (Combustible Liquids); Class D1B (Materials Causing Immediate and Serious Toxic Effects, Toxic Material); Class D2B (Materials Causing Other Toxic Effects, Toxic Material)

**Emergency Overview**: Pale yellow liquid. Slightly soap-like amine odor. Warning! Combustible liquid and vapor. POISON! May be fatal if swallowed. Causes eye irritation. May cause skin and respiratory irritation. May cause central nervous system depression. May cause long-term adverse effects in the environment. This material is highly toxic to aquatic invertebrates, toxic to fish and harmful to aquatic plants and earthworms.

**POTENTIAL HEALTH EFFECTS**:

**Signs and symptoms of short-term (acute) exposure**

- **Inhalation**: May cause irritation to the nose, throat and upper respiratory tract. May cause headache, nausea, dizziness and other symptoms of central nervous system depression.
- **Skin**: May cause mild to moderate skin irritation.
- **Eyes**: May cause moderate to severe irritation.
- **Ingestion**: May be fatal if ingested. May cause dizziness, drowsiness, nausea, headache, hypotension, vomiting, convulsions, tremors, coma, and other symptoms of central nervous system depression. Could eventually cause death as a result of respiratory failure.

**Effects of long-term (chronic) exposure**: Prolonged or repeated skin contact may cause irritation, defatting or dermatitis (rash).

**Carcinogenic status**: See TOXICOLOGICAL INFORMATION, Section 11.

**Additional health hazards**: See TOXICOLOGICAL INFORMATION, Section 11.

**Potential environmental effects**: This material is highly toxic to aquatic invertebrates, toxic to fish and harmful to aquatic plants and earthworms. See ECOLOGICAL INFORMATION, Section 12.

**SECTION 3 - COMPOSITION/INFORMATION ON INGREDIENTS**

SECTION 4 - FIRST AID MEASURES

Inhalation: Immediately remove person to fresh air. If breathing has stopped, give artificial respiration. Obtain medical attention if symptoms develop and persist.

Skin contact: Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Obtain medical attention if symptoms develop and persist. Wash contaminated clothing before reuse.

Eye contact: Immediately flush eyes with running water for at least 20 minutes. Obtain medical attention immediately.

Ingestion: If material is swallowed, get immediate medical attention. Do not induce vomiting, unless directed to do so by qualified medical personnel. Have victim rinse mouth with water, then give one to two glasses of water to drink. Never give anything by mouth to an unconscious person.

Notes For Physician: Treat symptomatically.

SECTION 5 - FIRE FIGHTING MEASURES

Fire hazards/conditions of flammability: Combustible liquid and vapor. Product will ignite when exposed to extreme heat and flame. Material may decompose when exposed to heat and flame. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure.

Oxidizing properties: None known.

Explosion data: Sensitivity to mechanical impact / static discharge: Not expected to be sensitive to mechanical impact or static discharge.

Suitable extinguishing media: Carbon dioxide or dry chemical for small fires. For large fires, use water spray or foam. Do not use water jet, as this may spread burning material.

Special fire-fighting procedures/equipment: Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame. Avoid spreading burning solid with water spray used for cooling purposes.

Hazardous combustion products: Carbon oxides; nitrogen oxides (NOx); Aldehydes; irritating fumes and smoke.

NFPA Rating: 0 - Minimal 1 - Slight 2 - Moderate 3 - Serious 4 - Severe

Health: 2 Flammability: 2 Instability: 1 Special Hazards: None

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions: Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment including self-contained breathing apparatus. Refer to Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.

Environmental precautions: Ensure spilled product does not enter drains, sewers, waterways, or confined spaces. If necessary, dike well ahead of the spill to prevent runoff into drains, sewers, or any natural waterway or drinking supply.

Spill response/cleanup: Remove all sources of ignition. Ventilate area of release. Stop the spill at source if it is safe to do so. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Place used absorbent in containers for disposal. For a water spill, confine the spill immediately with booms. Notify the appropriate authorities as required.

Prohibited materials: None known.

Special spill response procedures
In case of a transportation accident, in the United States contact CHEMTREC at 1-800-424-9300 or International at 1-703-527-3887. If a spill/release in excess of the EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8002). US CERCLA Reportable quantity (RQ): Calcium dodecylbenzene sulfonate (1000 lbs / 454 kg)

SECTION 7 - HANDLING AND STORAGE

Safe Handling procedures

This material is a combustible, harmful liquid. Wear chemically resistant protective equipment during handling. Use only in well-ventilated areas. Avoid contact with eyes, skin and clothing. Avoid breathing vapors or mists. Do not ingest. Keep away from children and all unprotected persons. Do not use near sources of heat, flame or direct sunlight. Keep away from incompatibles. Use caution when opening cap. Keep containers tightly closed when not in use. Wash thoroughly after handling.

Storage requirements

Store in a cool, dry, well ventilated area. Keep away from excessive heat, open flames, sparks and other possible sources of ignition. Keep away from incompatibles. Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized personnel. Inspect periodically for damage or leaks. No smoking in the area.

Incompatible materials

Strong oxidizing agents; Acids; Bases; halogens; Alkali metals.

Special packaging materials

Always keep in containers made of the same materials as the supply container.

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure Limits

</tr>
</tbody>
</table>

* Note: The ACGIH TLV listed above for the following ingredient(s) is an AIHA WEEL: N-methyl-2-pyrrolidone

Ventilation and engineering measures

Provide sufficient ventilation to keep vapour concentration below the given TLV and/or PEL.

Respiratory protection

Respiratory protection is required if the concentrations exceed the TLV. Wear a pesticide respirator jointly approved by the MSHA and NIOSH. Advice should be sought from respiratory protection specialists.

Skin protection

Impervious gloves must be worn when using this product. Small tears in gloves and cross-contamination can easily occur. Change gloves frequently and limit manual work. Advice should be sought from glove suppliers.

Eye / face protection

Chemical splash goggles must be worn when handling this material.

Other protective equipment

Wear impervious chemical apron and protective clothing (water-proof pants, coat, hat and boots) to prevent skin contact. An eyewash station and safety shower should be made available in the immediate working area.

General hygiene considerations

Avoid breathing vapors or mists. Avoid contact with skin, eyes and clothing. Do not eat, drink, smoke or use cosmetics while working with this product. Before removing gloves clean them with soap and water. Always wash hands, face and arms with soap and water before smoking, eating or drinking. After work, take off all protective equipment, work clothes and shoes, and wash with soap and water. Respirator should be cleaned and filter replaced according to manufacturer’s instructions. Wear only clean, uncontaminated clothes when leaving place of work.

ZORO MITICIDE / INSECTICIDE

MSDS Revision Date (dd/mm/yyyy): 15/03/2010

pH : 6.5 @ 20°C (1% emulsion in water)

Boiling point : Decomposition temperature: 314.6°F / 157°C (1-Hexanol)

Melting/Freezing point : N/Av

Vapour pressure (mmHg @ 20° C / 68° F) : Abamectin: 1.5 x 10 -9 mmHg @ 20°C; N-methyl-2-pyrrolidone: 0.3 mmHg @ 20°C; 1-Hexanol: 0.7 mmHg @ 20°C

Vapour density (Air = 1) : Abamectin: 0.54 mg/L @ 20°C

Solubility in water : Miscible

Coefficient of water/oil distribution : Abamectin: log Kow = 2.0

Decomposition temperature: 314.6°F / 157°C (1-Hexanol)

Abamectin: log Kow = 2.0

Coefficient of water/oil distribution

Abamectin: 0.54 mg/L @ 20°C

STABILITY AND REACTIVITY

Stability and reactivity : Stable under the recommended storage and handling conditions prescribed. When exposed to air, product may form hydroperoxides which may be accelerated by direct sunlight.

Hazardous polymerization : Will not occur.

Conditions to avoid : Keep this product away from heat, sparks, flame, and other sources of ignition (e.g. pilot lights, electric motors, static electricity). Direct local heating, such as electric or steam heating must be avoided. Keep away from direct sunlight.

MATERIALS TO AVOID AND INCOMPATIBILITY : Avoid contact with incompatible materials. See Section 7 (Handling and Storage) for further details.

Hazardous decomposition products : None known, refer to hazardous combustion products in Section 5.

SECTION 11 - TOXICOLOGICAL INFORMATION

Target organs : Eyes, skin, respiratory system, digestive system, central nervous system.

Routes of exposure : Inhalation: YES Skin Absorption: NO Skin & Eyes: YES Ingestion: YES

Toxicological data : Estimated value(s) based on measurements on a similar product:

LD50 Oral (rat): 250 mg/kg
LD50 Dermal (rat): >4000 mg/kg
LC50 Inhalation (rat): >3.87 mg/L/4hrs

Carcinogenic status : No components are listed as carcinogens by ACGIH, IARC, OSHA or NTP.

Reproductive effects : Not expected to have other reproductive effects.

Teratogenicity : Not expected to be a teratogen.

Mutagenicity : Not expected to be mutagenic in humans.

Epidemiology : Not available.

Sensitization to material : Not expected to be a skin or respiratory sensitizer.

Synergistic materials : Not available.

Irritancy : Irritating to eyes, respiratory system and skin.

Conditions aggravated by overexposure : Pre-existing skin, eye, respiratory and central nervous system disorders.

SECTION 12 - ECOLOGICAL INFORMATION
ZORO MITICIDE / INSECTICIDE

MSDS Revision Date (dd/mm/yyyy): 15/03/2010

Ecotoxicity
- This product is an insecticide. The active ingredient is: Abamectin
- The toxicity of the active ingredient to wildlife species is measured to be:
  - Fish - 96-Hr LC50, Mirror carp (Cyprinus carpio) = 3.28 mg/L
  - Birds - LD50, Japanese quail (Coturnix coturnix japonica) = >2000 mg/kg
  - Bees - 48-Hr LD50, Bees = 4.2 μg/bee

Mobility
- The active ingredient is mobile in soil.

Persistence
- The active ingredient is not readily biodegradable. Degradation half-lives vary with circumstances and have been found to vary from 14 to 20 days in different soil types.
- The active ingredient is degraded photochemically in soil and water.

Bioaccumulation potential
- The active ingredient is not considered to have a bioaccumulative potential. The bioconcentration factor (BCF) was measured to be: 54 in zebrafish (Danio rerio, whole fish)

Other Adverse Environmental effects
- This product is an insecticide. This material is highly toxic to aquatic invertebrates, toxic to fish and harmful to aquatic plants and earthworms. This product is not considered as harmful to birds or soil microorganisms. The product should not be allowed to enter drains or water courses, or be deposited where it can affect ground or surface waters.

SECTION 13 - DISPOSAL CONSIDERATIONS

Handling for Disposal
- Handle waste according to recommendations in Section 7.

Methods of Disposal
- Do not contaminate water, foodstuffs, feed or seed by storage or disposal. For disposable containers, triple rinse (or equivalent) containers and add rinse material to disposal tank. Follow any additional local, state or federal requirements for cleaning containers prior to disposal. Make the empty, rinsed container unsuitable for further use by puncturing. Dispose in accordance with all applicable federal, state, provincial and local regulations. Contact your local, state, provincial or federal environmental agency for specific rules.

RCRA
- If this product, as supplied, becomes a waste in the United States, it may meet the criteria of a hazardous waste as defined under RCRA, Title 40 CFR 261. It is the responsibility of the waste generator to determine the proper waste identification and disposal method. For disposal of unused or waste material, check with local, state and federal environmental agencies.

Additional information
- For shipments by ground within the United States, the Limited Quantity exception may apply. Refer to 49CFR section 173.153 for additional information.
- Within Canada, the Limited Quantity Exemption may apply for containers which hold specific quantities of the product. Under the TDGR, refer to section 1.17 for Limited Quantity Exemption information, if shipping under this exemption.

SECTION 15 - REGULATORY INFORMATION

US Federal Information:
- OSHA: This material is classified as hazardous under OSHA regulations (29CFR 1910.1200).
- CERCLA Reportable Quantity (RQ) (40 CFR 117.302): See Section 6
SARA TITLE III: Sec. 302, Extremely Hazardous Substances, 40 CFR 355: No Extremely Hazardous Substances are present in this material.

SARA TITLE III: Sec. 311 and 312, MSDS Requirements, 40 CFR 370 Hazard Classes: Fire Hazard; Immediate (Acute) health hazard; Chronic Health Hazard. Under SARA Sections 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current thresholds are 500 pounds for the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.

SARA TITLE III: Sec. 313, Toxic Chemicals Notification, 40 CFR 372: This product may be subject to SARA notification requirements, since it contains Toxic Chemical constituents above their de minimus concentrations. This product contains: N-methyl-2-pyrrolidone; Abamectin.

US State Right to Know Laws:
California Proposition 65: This product contains a chemical known to the State of California to cause developmental harm. This product contains: N-methyl-2-pyrrolidone.

International Information:
This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and this MSDS contains all the information required by the CPR.
